Abuja, Nigeria (Open to Global Remote Roles)

## Software Engineer

A Software Engineer with over 3 years of experience designing, developing, and deploying high-performance software solutions across diverse industries, including remote and distributed team environments. Expert in full-stack development, system architecture, cloud-based solutions, and Agile/Scrum methodologies, with a demonstrated history of delivering scalable, secure, and user-focused applications. Experienced at leading different functional and remote development teams, optimizing system performance, and implementing innovative solutions that drive digital transformation and business growth. Intent in continuous professional development, leveraging emerging technologies, and consistently delivering impactful solutions that create long-term value for clients and organizations.

## Areas of Expertise

- JavaScript (ES6+) & PHP
- Bootstrap
- MySQL, NoSQL & PostgreSQL
- Docker
- CI/CD Pipelines
- Postman & Swagger
- Proactive Communication
- Conflict Resolution across team
- Laravel
- REST API Development & Integration
- Database Design & Optimization
- Cloud Deployment & Scalability
- TDD
- Leadership & Team Collaboration
- Adaptability & Continuous Learning
- Independence & self-discipline
- Node.js
- Secure Authentication (JWT, OAuth)
- AWS (S3, EC2)
- Git, GitHub, GitLab & Bitbucket
- API Testing & Documentation
- Problem-Solving & Critical Thinking
- Time Management & Prioritization

## Remote Work Readiness

- Experienced working across 3+ time zones (US, Africa, Europe).
- Skilled in async communication & Project tracking.
- Strong home office setup ensuring reliable performance.
- Skilled with advance remote collaboration tools such as slack, zoom, trello, jira, notion etc
- High productivity & Accountability
- Expert at cross-cultural communication skills

# Career Experience

Fullstack & IT technician (NYSC) at Army College of and Children Affairs Academy, Ilorin

2024 — 2025

- Designed and deployed scalable fullstack web applications, improving system efficiency and user engagement by 35%.
- Managed IT infrastructure, resolving technical issues and reducing downtime incidents by 40% through proactive monitoring and maintenance.
- Developed and optimized database solutions that enhanced data retrieval speed by 50%, supporting smoother business operations.
- Implemented automation scripts and security measures that minimized recurring IT support requests by 30%.
- Collaborated with cross-functional teams to integrate new technologies, increasing overall project delivery speed by 25%.

Fullstack Developer at Kwara Tech Institute , Ilorin

2024 — 2025

- Developed and deployed scalable web applications using React, Node.js, and MongoDB, improving system efficiency by 35%.
- Optimized database queries and backend services, which reduced application load time by 40%.
- Led cross-functional teams in implementing CI/CD pipelines, accelerating deployment cycles by 50%.
- Designed and integrated RESTful APIs that enhanced third-party system compatibility, increasing product adoption by 25%.
- Mentored junior developers and enforced coding standards, resulting in a 30% boost in overall team productivity.

Frontend Developer (Remote - Europe Markets) at Tech in Uk Institute

2023 — 2024

- Designed and developed responsive web applications using React.js, JavaScript (ES6+), and CSS3, improving page load speed by 35% and boosting overall UI/UX performance.
- Integrated RESTful APIs and collaborated with backend developers to streamline data flow, reducing data retrieval time by 40% and enhancing application scalability.
- Built and maintained reusable React components and state management (Redux), cutting feature development time by 25% and ensuring consistent frontend architecture.
- Refactored legacy frontend codebase and implemented React Hooks for stateful logic, improving application performance and increasing user engagement by 20%.
- Partnered with the QA/testing team to identify and resolve UI defects, achieving a 99% bug-free release rate and improving software quality assurance metrics.

Research & Data Analyst at Freelancer

February 2022 — November 2022

- Conducted comprehensive data analysis using SQL and Python, improving data accuracy by 25% and supporting strategic business decisions.
- Developed and maintained dashboards in Power BI and Tableau, streamlining reporting processes and reducing manual reporting time by 30%.
- Executed market research and competitive analysis, generating actionable insights that increased client engagement by 20%.
- Automated data collection and cleaning processes, enhancing efficiency and reducing error rates by 40%.
- Collaborated with cross-functional teams to interpret complex datasets, delivering presentations and reports that informed key operational strategies, achieving a 15% improvement in project outcomes.

Computer Operator at Matrix Training Institute, Abuja

January 2015 — December 2016

- Monitored and maintained computer systems, servers, and networks, achieving 99% uptime and ensuring seamless business operations.
- Executed data entry, processing, and report generation tasks with 98% accuracy, streamlining workflow efficiency for the department.
- Troubleshoot hardware and software issues, reducing system downtime by 30% and enhancing overall IT support performance.
- Managed backup and recovery processes, securing 100% of critical business data and minimizing risk of data loss.
- Collaborated with IT teams to implement automation scripts, improving repetitive task completion speed by 40%.

## Education

B.Ed/B.Sc in Physics Education, September 2017 — July 2022

University of Nigeria Nsukka, Enugu State

Diploma, September 2015 — July 2017

Matrix Training Institute , Abuja

## Licenses & Certifications

Data Science - IBM - 2023

Completion in Programming - Hub Machine Learning - November 2022

Double Redirection Test - Dart - May 2022

## Additional Experience

Software Development Tutor at Freelance, Abuja

June 2022
